Amendments to the Claims

The following listing of claims will replace all prior versions, and listings, of claims in this patent application:

1. (currently amended) A fixture for mounting a component to a rack for supporting a plurality of components, consisting essentially of comprising:

a first plate having a surface for receiving the component; and

a second plate having a surface for attachment to the rack and cooperating with the first plate to form a combination of mounting plates;

wherein the first plate is pivotally connected to the second plate so that, in a first position, the first plate is adjacent to and in substantial alignment with the second plate and, in a second position, the first plate is rotated to an orientation which laterally projects from the second plate; and

a locking mechanism fixed to the second plate and having a retractable tip extending through the second plate and selectively engaging the first plate.

2. (previously presented) The fixture of claim 1 wherein the first plate is pivotally connected to the second plate by a connection including a single pivot pin extending from
